Skills Canada National Competition

Winnipeg
May 24 - 27
2023

WELCOME, Executive Director

When you think of the skilled trades, what comes to mind? Do you think boring? Dirty? Low paying? Think again! Try challenging, technologically advanced and financially rewarding. The **Manitoba Trades Booklet** is here to dispel the myths and replace them with an encouraging set of facts.

Consider this booklet as a companion on the road to making an informed career decision, or in discussion with your child or student(s). If you have any questions, or would like more information, please contact **Skills Canada Manitoba** by phone at (204)927-0250 or visit the website, www.skillsmanitoba.ca.

Manitoba's continuing competitiveness in the global marketplace depends on attracting and retaining qualified workers in the skilled trades. With the projected number of people leaving the skilled workforce exceeding the expected number of new entrants, the challenge has escalated to a crisis.

Skills Canada Manitoba is committed to letting young people know the facts about the exciting opportunities that exist in the skilled trades and technologies field. Please use this booklet as a source of information about viable first choice career options. In some cases, you may not have realized the opportunities that existed.

Skills Canada Manitoba is reaching new heights. We build awareness with youth through our programs such as the **In-School Program®**, **Northern In-School Program**, **the Cardboard Boat Race**, **Extreme Sledding**, **a Model Wind Turbine Competition**, **a Skilled Trades and Technology Showcase**, **Young Women's Conferences**, **Youth in Manufacturing**, **Skills Manitoba Competition**, **Northern Programs** and equip them with the tools to succeed. We combine our efforts with partnerships in education, industry and government and the outcomes are remarkable; youth advocating the benefits of apprenticeships; educators experiencing growth in apprenticeship programs; employers seeking skilled apprentices and Government committing to vibrancy in Manitoba's future.

I hope that you find this book informative and helpful as you consider career opportunities in the skilled trades and technologies. We hope to share these opportunities with as many young people throughout Manitoba as possible. Please feel free to provide your feedback to mariapa@skillscanada.com.

With warmest regards,

Maria Pacella

Executive Director

Skills Canada Manitoba hosts many events throughout the year. Following are brief outlines of the **Winnipeg and surrounding area programs.**

PROGRAMS WE OFFER

In-School Program

An in-school presentation program for grades 5 to 12 that provides young people from across the province with information about the vast career opportunities in the skilled trades and technologies.

Northern Manitoba Programs

A series of skills trades and technology programs for Northern Manitoba; the Northern In-School Program, Young Women's Conferences, Skills Trades and Technology Showcases (Boys), the Extreme Sledding Competition and Trade and Technology Olympics

Skilled Trade and Technology Showcase

A one day program for grade 8 students, spent at a host school, where they have the opportunity to try hands on activities and to learn about different careers in trade and technology. The showcase is designed to educate students on a variety of occupations and opportunities that exist in Manitoba in trades and technology. The day is a combination of hands on learning, demonstrations and presentations from individuals working in different Manitoba industries.

Cardboard Boat Race

This program demonstrates the importance of studying science, math and technology in a fun, practical and interactive manner. It's amazing to witness a team of grades 10 to 12 students build a boat with cardboard, glue, duct tape and string and watch as they race their boat across a pool of water to the finish line.

Young Women's Conference

A one day conference for young women to learn about trade and technology careers available in today's employment market. The conference highlights different vocations in trades and technology, introduces young women to women mentors working in the trades or technology field and provides employment and career planning information.

Model Wind Turbine Competition

Grades 9 & 10 students across Manitoba have an opportunity to use their knowledge, skills, leadership, teamwork and ingenuity to design and build a working model wind turbine in this one day competition.

Extreme Sledding

Grades 7 students, in teams of four will design and construct a sled and then participate in a race through a motor-cross style course.

Youth in Manufacturing

Grades 9 & 10 students will be exposed to the manufacturing processes from design to the building and assembling of a product and ultimately the marketing and sales process.

Young Women in Technology Conference

A one day conference geared for young women in Grades 6-8 to learn about technology careers available in today's employment market. The conference will highlight different areas of technology, including Civil Engineering, Computers, Electronics and Robotics. The conference aims to give youth the message that math, science and technology skills are increasingly more valuable, fun and financially rewarding.

Skills Manitoba Competition

Our cornerstone event, is a one day event that provides young Manitobans the opportunity to showcase their talents in an Olympic style, province wide contest. Students compete in over 40 different hands on contests at the secondary and post secondary level that are designed (and judged) by industry professionals and educators. Winners of the provincial competition may form team Manitoba and compete against their peers at the Canadian Skills Competition, leading to the possibility of competing in the World Skills Competition.

WHAT IS +1?

The +1 represents the Technical Skills necessary for skilled trade and technology careers. Technical Skills relate to expertise someone possesses that assist in the completion of a job or task. In general, these are abilities acquired through practice and learning. Most skilled trades require the hands-on ability to apply math, science and/or trade-specific expertise to a particular problem or challenge. Tradespeople not only need to be able to diagnose and understand the scope of a problem, but also apply practical, mechanical, or technical skills to its solution, using the tools of trade to carry out tangible work.

ADAPTABILITY

ADAPTABILITY – NEW

Your ability to achieve or adjust goals and behaviours when expected or unexpected change occurs, by planning, staying focused, persisting, and overcoming setbacks. For example, we use this skill to change work plans to meet new deadlines, learn how to work with new tools and improve our skills through feedback.

Why this skill is important

Major changes in society are affecting how you work, live, and learn and require you to constantly adapt to change. Strong adaptability skills will help you deal effectively with change and to learn new skills and behaviours when needed, stay focused on your responsibilities and goals, and not give up when situations are difficult. They will help you stay positive and manage the stress that can come from change in the workplace, community, and your life at home.

COLLABORATION

COLLABORATION

Your ability to contribute and support others to achieve a common goal. For example, at work we use this skill to provide meaningful support to team members while completing a project.

Why this skill is important

Today people are more connected within communities, across the country, and around the world. Modern workplaces are more diverse, and many jobs require you to work with others from different backgrounds and cultures to complete tasks and solve problems. It is important to be able to work respectfully with people who have different professions, experiences, cultures, and backgrounds. Collaboration skills help you perform better in a team by understanding how to support and value others, manage difficult interactions and contribute to the team's work. Strong collaboration skills help you build and maintain positive relationships with others at work, in school, and in other parts of your life.

COMMUNICATION

COMMUNICATION

Your ability to receive, understand, consider, and share information and ideas through speaking, listening, and interacting with others which includes broader concepts such as non-verbal communication. For example, we use this skill to listen to instructions, serve customers and discuss ideas.

Why this skill is important

Strong communication skills help you share information in a way that others can clearly understand. You also need strong communication skills to listen to, pay attention to, and understand others. In all jobs, communication skills are important for developing good working relationships with co-workers and clients, including those from different backgrounds and cultures. You also need these skills to work effectively in a team, understand a variety of viewpoints, and to gather and share information while problem solving – whether at work or in your daily life.

CREATIVITY & INNOVATION

CREATIVITY & INNOVATION – NEW

Your ability to imagine, develop, express, encourage, and apply ideas in ways that are novel, unexpected, or challenge existing methods and norms. For example, we use this skill to discover better ways of doing things, develop new products, and deliver services in a new way.

Why this skill is important

Creativity and innovation skills help you come up with new, unique, or “outside the box” ideas or to approach something differently than in the past, both at work and outside work. A curious mindset that finds inspiration from a broad range of experiences and perspectives helps develop creativity and innovation skills. Employers are increasingly seeking people who can apply creativity and innovation skills to their work in our increasingly diverse settings, and to come up with new solutions or approaches to tackling challenges. With strong creativity and innovation skills, you can also support and inspire others to develop their own creativity and innovation.

DIGITAL

DIGITAL

Your ability to use digital technology and tools to find, manage, apply, create and share information and content. For example, we use this skill to create spreadsheets, safely use social media, and securely make online purchases.

Why this skill is important

Digital technology has changed the way you find and share information, solve problems, and communicate with others. Most jobs now use digital skills, and you need them when you apply other skills such as reading, writing and numeracy. Digital skills help you keep up with changing demands in the modern workplace and in your daily life.

NUMERACY

NUMERACY

Your ability to find, understand, use, and report mathematical information presented through words, numbers, symbols, and graphics. For example, we use this skill to perform calculations, manage budgets, analyze and model data and make estimations.

Why this skill is important

The modern economy requires numeracy skills that go beyond basic arithmetic. Understanding numbers remains critical to functioning in today's society. Many jobs require the ability to work with numbers and math. Numeracy skills are also needed in a wide variety of daily contexts, including managing your finances and making sense of statistics in the news.

PROBLEM SOLVING

PROBLEM SOLVING

Your ability to identify, analyze, propose solutions, and make decisions. Problem solving helps you to address issues, monitor success, and learn from the experience. For example, we use this skill to make hiring decisions, select courses of action and troubleshoot technical failures.

Why this skill is important

Every day you use information to make decisions, solve problems, and take actions. This can include thinking about different ways to complete a task and choosing the best solution, or deciding what to do first when several activities are competing for your attention. The ability to think, make decisions, and solve problems effectively improves the way you carry out activities, and meet goals and deadlines at work or in other daily life situations. Strong problem-solving skills will help you gather the right information, identify and solve problems, and make better decisions. As you learn from these experiences, you will strengthen your problem-solving skills and more quickly and effectively adapt to change.

READING

READING

Your ability to find, understand, and use information presented through words, symbols, and images. For example, we use this skill to locate information on forms and drawings, and to read items such as emails, reports, news articles, blog posts and instructions.

Why this skill is important

Reading helps you to understand and interpret the meaning within the text. Strong reading skills allow you to do your job and to work safely, and efficiently. You use reading skills to learn other skills, for example, by reading online learning resources. Reading is important in day-to-day activities, such as understanding changes in travel advisories and interpreting the important messages in articles.

WRITING

WRITING

Your ability to share information using written words, symbols, and images. For example, we use this skill to fill out forms and applications, and write emails, reports and social media posts.

Why this skill is important

We write to communicate ideas and information to other people. In today's world, we require writing skills that are suitable for different situations including digital platforms. Knowing what to write, how much to write, and in which style to write is important. Writing skills ensure your writing is suitable for your purpose, the intended reader, and the context.

INDUSTRIAL TRADES

"I first started thinking about skilled trades as a career in my last year of high school. I never thought it would lead me down the path it has. I've had my entire education paid for through bursaries from generous companies, I've traveled the world to compete against the best in my trade, and I've landed a great job!"

Silas Meeches

**NC Programmer,
Magellan Aerospace**

Great jobs...
Great future!

| Trade | HSAP | Red Seal | NOC Code | Compulsory Certification |
|--|------|----------|----------|--------------------------|
| CNC Machinist | | • | 7231 | |
| Electric Motor System Technician | • | • | 7333 | |
| Industrial Electrician | • | • | 7242 | * |
| Instrumentation and Control Technician | | • | 2243 | |
| Machinist | • | • | 7231 | |
| Power Electrician | • | | 7243 | |
| Rig Technician | | • | 8232 | |
| Tool & Die Maker | • | • | 7232 | |
| Water and Wastewater Technician | • | | 9243 | |
| Welder | • | • | 7237 | |

HSAP – High School Apprenticeship Program. Allows students in high school to begin an apprenticeship program in grade 10.

Red Seal – The Red Seal program is Canada's standard of excellence for skilled trades. Obtaining a Red Seal endorsement on a Certificate of Qualification acknowledges a journeyperson's competence and quality workmanship and ensures recognition of his/her certification across Canada.

(Journeyman status is obtained when Provincial/Red Seal endorsed certification in that trade is achieved.)

NOC – National Occupational Classification code system

* Compulsory Certification - To legally work in these trades, you must be an apprentice or hold a Certificate of Qualification issued by the Province of Manitoba.

CNC Machinist

| | |
|--------------|------|
| HSAP | |
| Red Seal | • |
| NOC Code | 7231 |
| Cert. Req'd. | |

What do they do?

A CNC machinist is someone who programs, sets up and operates metal-cutting computer numerical control machines. Machinists are employed in machine shops, rail companies and by metal product, and farm machinery manufacturing and the aerospace industries.

You can also train to be a CNC machinist after you complete either your machinist or tool and die certification.

Potential Employers

- Canadian Manufacturers and Exporters (Manitoba)
- Canadian Tooling and Machining Association
- Machinist and Aerospace Workers International

What kind of education, training, requirements and experience are needed?

- You need 2 levels of Machinist before they can go into tool and die, they can only get 1 level upon high school graduation.

For more information

<http://www.manitoba.ca/tradecareers>

Electric Motor System Technician

| | |
|--------------|------|
| HSAP | • |
| Red Seal | • |
| NOC Code | 7333 |
| Cert. Req'd. | |

What do they do?

Service electric motors, transformers, switchgears, generators and other equipment used to power machinery.

Potential Employers

- Electrical repair shops
- Manufacturing plants

What kind of education, training, requirements and experience are needed?

- You must have Grade 12 or equivalent academic standing including recommended courses in pre-calculus math.
- Completion of a four-year apprenticeship program is required.
- Contact Apprenticeship Manitoba for an apprenticeship application to formalize an apprenticeship agreement with your employer.

For more information

Electrical Apparatus Service Association, Western Canada Chapter

Industrial Electrician

| | |
|--------------|------|
| HSAP | • |
| Red Seal | • |
| NOC Code | 7242 |
| Cert. Req'd. | • |

What do they do?

Install, maintain, test, troubleshoot and repair industrial electrical equipment.

Potential Employers

- Electrical contractors
- Government
- Maintenance departments of buildings and other establishments

What kind of education, training, requirements and experience are needed?

- Completion of Grade 12 is required including recommended courses in pre-calculus math.
- Completion of a four-year apprenticeship program is required.
- Contact Apprenticeship Manitoba for an apprenticeship application to formalize an apprenticeship agreement with your employer.

Machinist

| | |
|--------------|------|
| HSAP | • |
| Red Seal | • |
| NOC Code | 7231 |
| Cert. Req'd. | |

What do they do?

Operate a variety of computer controlled equipment, machine tools and drills to make precisely sized metal products.

Potential Employers

- Machine shops
- Railways
- Metal products and farm machinery manufacturers
- Aerospace industry

What kind of education, training, requirements and experience are needed?

- You must have Grade 12 or equivalent high school academic standing including recommended courses in applied or pre-calculus math.
- Completion of a four-year apprenticeship program is required.
- Contact Apprenticeship Manitoba for an apprenticeship application to formalize an apprenticeship agreement with your employer.
- Once you obtain your Interprovincial Certification as a Machinist, you are eligible to also train for your Provincial Certification as a CNC Machinist.

TRANSPORTATION TRADES

“My focus in skilled trades, specifically autobody repair, started in grade 10 and I quickly realized how much I loved it. This led to 2 Provincial Golds, 2 National Golds, competition in Australia, and eventually, participation in the World Skills Competition in Abu Dhabi!

Being able to see the finished product and the customer’s reaction is my favorite part of this career. I get to take something damaged or old and make it look brand new again, like day one. That is the most rewarding feeling.”

Ashley Weber

**Motor Vehicle Body Repairer,
Urban Autobody**

Great jobs...

electrical *trades*

IBEW Code of Excellence Training Center

If you like to work with both your mind and your hands and enjoy calculations and precision work, then we can help you gain the skills and experience you need for a rewarding career as an electrician.

Construction Electrician Pre-employment introduces you to a variety of career opportunities in the electrical trades.

Whether your interest is electrical installation or maintenance, residential or commercial wiring, machine repair or some other aspect of the electrical industry, our cooperative vocational education program leads to Level One electrician accreditation which is a great start towards employment as an apprentice.

We provide a combination of technical training and real world experience so that potential employers need not worry about your level of experience - you will come to them prepared to work. Employment opportunities are many, varied and well-paying. There is no limit to how far you can go!

For more information, to register or
to arrange an interview, please contact:

CONSTRUCTION TRADES

“I would encourage young people to find a trade that involves something you love doing and are passionate about. Then it can be exciting to go to work and create something great! I was always building things out of wood as a young teenager because that was what was available. My skills improved and I really enjoyed it. Competing at Skills and completing my apprenticeship has brought me opportunities I wouldn't have thought possible.”

Travis Wieler

**Custom Millworker,
Twin Creek Woodcraft**

**Great jobs...
Great future!**

HSAP – High School Apprenticeship Program. Allows students in high school to begin an apprenticeship program in grade 10.

Red Seal – The Red Seal program is Canada's standard of excellence for skilled trades. Obtaining a Red Seal endorsement on a Certificate of Qualification acknowledges a journeyperson's competence and quality workmanship and ensures recognition of his/her certification across Canada.
(Journeyman status is obtained when Provincial/Red Seal endorsed certification in that trade is achieved.)

NOC – National Occupational Classification code system

* Compulsory Certification - To legally work in these trades, you must be an apprentice or hold a Certificate of Qualification issued by the Province of Manitoba.

Boilermaker

| | |
|--------------|------|
| HSAP | • |
| Red Seal | • |
| NOC Code | 7234 |
| Cert. Req'd. | |

What do they do?

Gasfitter (Domestic Gasfitter *prerequisite for 'Gasfitter')

| | |
|--------------|------|
| HSAP | • |
| Red Seal | • |
| NOC Code | 7253 |
| Cert. Req'd. | |

What do they do?

Install, inspect, repair and maintain gas lines and gas equipment such as meters, regulators, heating units and appliances in residential, commercial and industrial establishments.

There are two types of gasfitters based on the license they obtain;

Gasfitter – works on all equipment, commonly referred to as commercial/industrial

Domestic Gasfitter – works on equipment with up to and including 400,000 BTU's (British thermal units)

Potential Employers

- Gas utility companies
- Gas servicing companies
- New home building and renovation
- Heavy industrial
- Institutional and commercial construction sectors

What kind of education, training, requirements and experience are needed?

- You must have Grade 12 or equivalent academic standing including a recommended course in Applied or Pre-Calculus Math and Physics.
- Domestic Gasfitter is a two- year apprenticeship program and pre-requisite to enrol in the two-year Gasfitter apprenticeship program.
- Contact Apprenticeship Manitoba for an apprenticeship application and to formalize an apprenticeship agreement with your employer.
- Apprentices who complete all of the levels of technical training and practical experience in the trades of Plumber, Refrigeration and Air-Conditioning Mechanic (Residential), Refrigeration and Air-Conditioning Mechanic (Commercial), and Steamfitter-Pipefitter will be granted advanced standing that is equivalent to the first level of the subcomponent trade of Domestic Gasfitter.

HSAP – High School Apprenticeship Program. Allows students in high school to begin an apprenticeship program in grade 10.

Red Seal – The Red Seal program is Canada’s standard of excellence for skilled trades. Obtaining a Red Seal endorsement on a Certificate of Qualification acknowledges a journeyperson’s competence and quality workmanship and ensures recognition of his/her certification across Canada.

(Journeyman status is obtained when Provincial/Red Seal endorsed certification in that trade is achieved.)

NOC – National Occupational Classification code system

* Compulsory Certification - To legally work in these trades, you must be an apprentice or hold a Certificate of Qualification issued by the Province of Manitoba.

Cook

Electrologist

| | |
|--------------|------|
| HSAP | • |
| Red Seal | |
| NOC Code | 6562 |
| Cert. Req'd. | * |

What do they do?

Removes unwanted body hair by using electric currents.

Potential Employers

- Beauty salons
- Electrolysis studios
- Scalp treatment and hair replacement clinics and other similar establishments
- Self-employed

What kind of education, training, requirements and experience are needed?

- You must have Grade 12 or equivalent high school academic standing.
- Completion of a one-year apprenticeship program is required for certification.
- Contact Apprenticeship Manitoba for an apprenticeship application and to formalize an apprenticeship agreement with your employer.
- Enrolment in or completion of technical training at an accredited institution is required before an apprenticeship.

Esthetician

| | |
|--------------|------|
| HSAP | • |
| Red Seal | |
| NOC Code | 6562 |
| Cert. Req'd. | * |

What do they do?

Esthetician – is comprised of two sub-trades: nail technician and skin care technician. Nail Technicians perform manicures and pedicures and apply artificial nail products. Skin Care Technicians perform body treatments, facial treatments, make-up applications, depilatory hair removal, and lash and brow tint services. Estheticians have completed and performed services in both sub-trades.

Potential Employers

- Beauty salons
- Electrolysis studios
- Scalp treatment and hair replacement clinics and other similar establishments
- Self-employed

What kind of education, training, requirements and experience are needed?

- You must have Grade 12 or equivalent high school academic standing.
- Completion of a one or two year apprenticeship program is required for certification as an Esthetician.
- Contact Apprenticeship Manitoba for an apprenticeship application and to formalize an apprenticeship agreement with your employer.
- Enrolment in or completion of technical training at an accredited institution is required before an apprenticeship.

Hairstylist

| | |
|--------------|------|
| HSAP | • |
| Red Seal | • |
| NOC Code | 6341 |
| Cert. Req'd. | * |

What do they do?

Shampoo, rinse, cut, trim, perm, colour and style hair.

Potential Employers

- Hairstyling salons
- Barber shops
- Retail product sales companies
- Theatre, film and television production companies

What kind of education, training, requirements and experience are needed?

- You must have Grade 12 or equivalent high school academic standing.
- Enrolment in or completion of technical training at an accredited institution is required before an apprenticeship.
- Completion of a two-year apprenticeship program is required.
- Contact Apprenticeship Manitoba for an apprenticeship application and to formalize an apprenticeship agreement with your employer.

Partsperson

| | |
|--------------|------|
| HSAP | • |
| Red Seal | • |
| NOC Code | 1522 |
| Cert. Req'd. | |

What do they do?

Manage and sell an inventory of parts for vehicles, appliances, machinery and equipment.

Potential Employers

- Automotive, heavy equipment, truck and parts distribution outlets.

What kind of education, training, requirements and experience are needed?

- You must have Grade 12 or equivalent academic standing.
- Completion of a three-year apprenticeship program is required.
- Contact Apprenticeship Manitoba for an apprenticeship application and to formalize an apprenticeship agreement with your employer.

For more information

Pork Production Technician

| | |
|--------------|------|
| HSAP | • |
| Red Seal | |
| NOC Code | 8252 |
| Cert. Req'd. | |

What do they do?

Handle and care for pigs in the breeding, farrowing, nursery and grow/finish stages.

Potential Employers

- Specialized farms

What kind of education, training, requirements and experience are needed?

- You must have Grade 12 or equivalent high school academic standing.
- Completion of a two-year apprenticeship program is required.
- Contact Apprenticeship Manitoba for an apprenticeship application and to formalize an apprenticeship agreement with your employer.

RED SEAL

The Canadian Council of Directors of Apprenticeship (CCDA) is responsible for the Interprovincial Standards "Red Seal" Program. The Red Seal program forms a partnership between the provincial, territorial and federal governments. Its goal is to provide skilled workers mobility across Canada by encouraging the standardization of training and certification programs. Red Seal certified workers can work anywhere in Canada where their trade is designated. They have qualified by passing industry developed interprovincial examinations that are based on the National Occupational Analysis.

Red Seal Trades designated in Manitoba

- Agricultural Equipment Technician
- Automotive Painter
- Automotive Service Technician
- Boilermaker
- Boom Truck Hoist, Mobile Crane and Tower Crane Operator
- Bricklayer
- Cabinetmaker
- Carpenter
- CNC Machinist
- Concrete Finisher
- Construction Craft Worker
- Construction Electrician
- Cook
- Electric Motor System Technician
- Floorcovering Installer
- Gasfitter
- Glazier
- Hairstylist
- Heavy Duty Equipment Technician
- Industrial Electrician
- Industrial Mechanic (Millwright)
- Instrumentation and Control Technician
- Insulator (Heat and Frost)
- Ironworker (Generalist)
- Landcape Horticulturist
- Lather Interior Systems Mechanic
- Machinist
- Motor Vehicle Body Repairer (Metal and Paint)
- Painter and Decorator
- Partsperson
- Plumber
- Recreation Vehicle Service Technician
- Refrigeration and Air Conditioning Mechanic
- Rig Technician
- Roofer
- Sheet Metal Worker
- Sprinkler Fitter
- Steamfitter-Pipefitter
- Tool and Die Maker
- Transport Trailer Technician
- Truck and Transport Mechanic
- Welder

BENEFITS OF APPRENTICESHIPS

As an apprentice you:

Receive hands on training – this is one of the best ways to learn.

Journey people are masters of their trade – they pass their knowledge onto apprentices to ensure a skill is learned correctly and safely.

As an apprentice you earn while you learn. The rate of pay increases with the amount of training undertaken.

Have a competitive edge! Registration and other costs are a fraction of what others pursuing a college diploma or university degree pay. Some diploma programs count towards an apprenticeship if at any time you decide to obtain your trade certification.

Secure greater opportunities for your future: job security, higher income, opportunities for advancement.

For Families and Teachers

Is this for my child or student? Many adults do not realize that the skilled trades and technologies can be such viable career options and rewarding job opportunities for young people.

These are careers that use some of the most sophisticated equipment available. Young people who train for these careers need to be intelligent, creative, hard working and committed. Training for many of these careers takes longer than acquiring a university degree.

We're trying to give you all of the information that is available so you can help the young people in your life make informed career choices.

We suggest that you talk to your child or student. Sit down with all of the information and study all of the options. We owe it to young people to let them excel and prosper. Remember when young people win, we all win.

Educational Requirements

The skilled trades and technologies are highly technical and take a firm commitment to master.

A university education can provide wonderful opportunities to our youth, but the fact remains that there are many more young people who do not attend university than those who do. We're making sure that those young people are not forgotten, misguided or misinformed and that they are aware of the wonderful career opportunities available to them.

What are the academic requirements?

Most trades require Grade 12 or equivalent academic standing. While mechanical and hands-on skills are still core requirements to a trade, you need to finish high school.

Positions in the trades are often technology-based and require math, science and computer skills. However, excellent reading, writing and communication skills are also very valuable.

What is the High School Apprenticeship Program (HSAP)?

HSAP lets you start your apprenticeship while you are still in high school. It combines regular high school instruction with paid, part-time, on-the-job apprenticeship training.

To begin, you will need a qualified, insured employer who will agree to train you as an apprentice. You will work with your school guidance counsellor and the HSAP co-ordinator at Apprenticeship Manitoba to ensure you meet all of the program's academic requirements. Then, together with the employer, you will set up a suitable on-the-job/academic timetable that allows you to attend all of your required high school classes.

How do I qualify?

To participate in HSAP you must be enrolled in an approved Manitoba High School program, be a minimum 16 years of age and completion of grade 9 (including core subjects).

It's a great opportunity

Manitoba's skilled, certified tradespeople play an important role in our society. In the next decade, many of them will be nearing retirement, leaving Manitoba with shortages in the skilled trades. That's where HSAP comes in. Think of it as an early opportunity to set goals for your future.

HSAP provides practical, paid, work experience and the opportunity to:

- get hands-on work experience (one academic credit for every 110 hours of work experience up to a maximum of 880 hours)
- earn up to eight optional academic credits for graduation
- get paid a specific rate that's more than provincial minimum wage
- apply your on-the-job training hours to continued, full-time apprenticeship training after graduation
- use the skills you learn for a career in management or to start your own business

Grants and Incentives

High School Apprenticeship Program (HSAP) Incentive

HSAP participants are eligible for financial help to offset Manitoba tuition costs for full-time, post-secondary apprenticeship training following their high school studies. For every 220 hours of on-the-job training obtained as a high school apprentice (up to a maximum of 880 hours), students who transfer into a full-time apprentice program after high school will receive a tuition exemption for one level of in-school training in Manitoba (to a maximum of four levels).

Various financial incentives and grants are available to both apprentices and employers who hire apprentices or journeypersons. Visit Apprenticeship Manitoba, www.manitoba.ca/tradecareers for more information.

All trades are eligible for HSAP. Although certain restrictions may apply. Please contact Apprenticeship Manitoba for requirements or eligibility.

TECHNOLOGIES

"I've always loved to take things apart to see how they work. With my education and Skills Manitoba experience, I now have a job where I get to design the kinds of things I used to take apart!

The electronics field is rapidly changing and there is always something new so my advice is to stay on top of technology and trends. Never stop learning and researching."

Jorgen Kaspick, C.E.T.

**Embedded Hardware Designer,
Price Electronics**

**Great jobs...
Great future!**

Although Canadians use the terms 'Technician' and 'Technologist' generally to describe many different occupations, **Engineering/Applied Science Technicians and Technologists are very distinct individuals.**

From the moment Manitobans wake up in the morning and turn on a light switch or shower, until the end of the day, they rely on the work of these professionals. Technicians install cable and phone, monitor traffic, and work in labs. Technologists design plans with engineers, create commercial buildings and return well sites properly to nature. They ensure fast-acting telephone networks, smart traffic signals, proper water pressure at home, perfectly clean water to drink, reliable natural gas service and electrical power, and smooth roads on which to drive.

Professional Technicians and Technologists impact your life everyday, from morning through the night. They do so by having participated in the design, selection, use, installation, testing and repair of devices and equipment related to all aspects of everyday life. As technology professionals, they provide essential services and protection as part of a large team which includes trades people, engineers and scientists.

For individuals wishing to become an Engineering Technologist they should have a strong science and mathematics education background. They should enjoy problem solving and can pay attention to detail.

Architectural Technology/Architectural Engineering Technology

Communications Engineering Technologist

Electrical Engineering Technologist

Electronic Engineering Technologist

Environmental Protection Technologist

Geomatics Engineering Technologist

Instrumentation and Control Engineering Technologist

Mechanical Engineering Technologist

Municipal Engineering Technologist

Structural Engineering Technologist

NOTE: Wages are based on a variety of government and industry sources and are meant as a GUIDELINE ONLY.

Architectural Technology/ Architectural Engineering Technology

Salaries

- \$45,000 per annum – starting
- \$74,000 per annum – average
- \$100,000+ per annum – high

Average Hourly Wage

- Student Work Co-op
\$19.50

What do they do?

Architectural Technology (AT) focuses on the technologies and generation for building construction documents. Architectural Engineering Technology A/E focuses on the engineering systems, architectural aspects, and construction practices that build a building.

Potential Employers

- Architecture firms
- consulting engineering firms
- building contractors
- building materials and equipment suppliers
- home design and construction companies
- Government (Municipal, Provincial, Federal)

What kind of education, training, requirements and experience are needed?

- In Manitoba, completion of a 20-month program in Architectural Technology, or an equivalent is usually required for Architectural Technician. Those interested in Architectural Technology may enter directly into the program.
- A 32-month college program in Architectural Engineering Technology, or an equivalent is usually required for Architectural Engineering Technologists. After successfully completing the first year of Civil Engineering Technology, you can choose the Architectural Engineering Technology option.

Communications Engineering Technologist

Salaries

- \$45,000 per annum – starting
- \$74,000 per annum – average
- \$100,000+ per annum – high

Average Hourly Wage

- Student Work Co-op
\$19.50

What do they do?

Develop new devices and solutions for mobile communications, design, install and maintain broadband communication systems used for internet access, fiber optics networks. Maintain broadcast studio and communications systems (TV and Radio), voice, data, monitoring and control systems. Install, commission, and maintain mobile communication networks.

Potential Employers

- Mobile service providers and developers
- Utilities
- Broadband service providers Communications,
- Wireless communications companies
- Oil and Gas Exploration and production companies
- Engineering consulting and design firms
- Provincial and Federal Government agencies and Canadian Forces

What kind of education, training, requirements and experience are needed?

- Completion of a two year Engineering Technology program with a focus on communications systems, device and applications.
- It is common for Engineering Technology programs to require the completion of a 4 month co-op placement term.
- Some employers require technologists to be certified by a provincial association, which in Manitoba is the Certified Technicians and Technologists Association of Manitoba (CTTAM).

(204) 784-1088 <http://www.cttam.com>

Electrical Engineering Technologist

Salaries

- \$45,000 per annum – starting
- \$74,000 per annum – average
- \$100,000+ per annum – high

Average Hourly Wage

- Student Work Co-op
\$19.50

What do they do?

Work independently or in teams to support of the design, commissioning, engineering sales and support; operation and maintenance of electrical power system generation; distribution and protection; manufacturing; construction; machine and process control and electricity utilization systems.

Potential Employers

- Electrical utilities
- Communications companies
- Manufacturers of electrical and electronic equipment
- Consulting firms
- Government (Municipal, Provincial, Federal)

What kind of education, training, requirements and experience are needed?

- In Manitoba, completion of a 28 month college program in Electrical Engineering Technology, or an equivalent is usually required for Electrical Engineering Technologists.
- Experienced technicians (with a one or two year college diploma) may advance to technologists positions.
- Most employers require technologists to be certified by a provincial association which in Manitoba is the Certified Technicians and Technologists Association of Manitoba. A period of supervised employment is required before certification.

Electronic Engineering Technologist

Salaries

- \$45,000 per annum – starting
- \$74,000 per annum – average
- \$100,000+ per annum – high

Average Hourly Wage

- Student Work Co-op
\$19.50

What do they do?

Work independently or in teams to design components; equipment, processes; infrastructure, or systems; interpretation or preparation of specifications and drawings; quality management; operations and maintenance; installations and or servicing of equipment and systems; project management; supervision of projects and training activities.

Potential Employers

- Aerospace Industry
- Cable companies
- Cell phone system providers
- Satellite manufacturers
- Manufacturers of electrical and electronic equipment
- Consulting firms
- Government (Municipal, Provincial, Federal)

What kind of education, training, requirements and experience are needed?

- In Manitoba, completion of a 28 month college program in Electronic Engineering Technology, or an equivalent is usually required for Electronic Engineering Technologists. After successfully completing the first year of Electrical Engineering Technology you can choose the Electronic option.
- Experienced technicians (with a one or two year college diploma) may advance to technologists positions.
- Most employers require technologists to be certified by a provincial association which in Manitoba is the Certified Technicians and Technologists Association of Manitoba. A period of supervised employment is required before certification.

Instrumentation and Control Engineering Technologist

Salaries

- \$45,000 per annum – starting
- \$74,000 per annum – average
- \$100,000+ per annum – high

Average Hourly Wage

- Student Work Co-op
\$19.50

What do they do?

Work independently or in teams to use their skills to design and calibrate systems used to measure, record, and control industrial process variables. Graduates have found employment as instrument engineering technologists, junior control loop designers, and technical sales people in engineering offices and manufacturing plants.

Potential Employers

- Private Industry
- Consulting Engineering Firms
- Manufacturers
- Technical Sales
- Government (Municipal, Provincial, Federal)

What kind of education, training, requirements and experience are needed?

- In Manitoba, completion of a 28-month year college program in Instrumentation and Control Engineering Technology, or an equivalent is usually required for Instrumentation Engineering Technologists.
- Experienced technicians (with a one or two-year college diploma) may advance to technologists positions.
- Most employers require technologists to be certified by a provincial association which in Manitoba is the Certified Technicians and Technologists Association of Manitoba. A period of supervised employment is required before certification.

Mechanical Engineering Technologist

Salaries

- \$45,000 per annum – starting
- \$74,000 per annum – average
- \$100,000+ per annum – high

Average Hourly Wage

- Student Work Co-op
\$19.50

What do they do?

Work in mechanical engineering fields such as the design, development, analysis, computer aided design, maintenance and testing of machines, components, tools, heating and ventilating systems, power generation and power conversion plants, manufacturing plants, automation and equipment.

Potential Employers

- Aerospace Industry
- Transportation equipment manufacturing
- Farm equipment manufacturers
- Government (Municipal, Provincial, Federal)
- A wide range of manufacturing and transportation industries

What kind of education, training, requirements and experience are needed?

- In Manitoba, completion of a 28 month college program in Mechanical Engineering Technology, or an equivalent is usually required for Mechanical Engineering Technologists.
- Experienced technicians (with a one or two year college diploma) may advance to technologists positions.
- Most employers require technologists to be certified by a provincial association which in Manitoba is the Certified Technicians and Technologists Association of Manitoba. A period of supervised employment is required before certification.

Municipal Engineering Technologist

Salaries

- \$45,000 per annum – starting
- \$74,000 per annum – average
- \$100,000+ per annum – high

Average Hourly Wage

- Student Work Co-op
\$19.50

What do they do?

Design and construction of civil works and municipal infrastructure; project inspection; materials testing, interpretation or preparation of specifications/drawings; construction management; contract inspection and administration; quantity surveying; engineering and construction survey layout.

Potential Employers

- Utilities
- Consulting engineering firms
- Construction firms
- Private industry
- Government (Municipal, Provincial, Federal)

What kind of education, training, requirements and experience are needed?

- In Manitoba, completion of a 32 month college program in Municipal Engineering Technology, or an equivalent is usually required for Municipal Engineering Technologists. After successfully completing the first year of Civil Engineering Technology, you can choose the Municipal Engineering Technology option.
- Experienced technicians (with a one or two year college diploma) may advance to technologists positions.

The Certified Technicians and Technologists Association of Manitoba (CTTAM)

CTTAM is the professional association that certifies and regulates Engineering Technicians and Technologists in Manitoba. It is an association of technically qualified individuals working in business and industry who have completed a significant level of post secondary technical education complemented by related practical experience.

CTTAM grants three Designations which are recognized nationally and internationally:

- Certified Engineering Technologist (C.E.T.)
- Applied Science Technologist (A.Sc.T.)
- Certified Technician (C.Tech.)

Consumers and technology professionals alike are always poised to learn about the latest advancements in technology and what can supply that crucial leading edge. Providing its members with guidance, career advantages and accreditation to which they might not otherwise have access, CTTAM offers the latest and the best, leading edge opportunities.

CTTAM credentials are recognized across Canada and internationally, making it easy to transfer to another jurisdiction. CTTAM has an agreement with each of the other provincial associations to allow certified Technicians and Technologists to transfer to another province and retain their certified status.

Many employers recognize the benefits of hiring CTTAM technology professionals. CTTAM members have been peer reviewed and deemed to have met national standards for education and experience related to engineering and science technologies. Members must have passed the professional practice exam on the code of ethics. All of these membership attributes provide the employer with assurance that when they hire a CTTAM member, they are hiring the most qualified technical person available.

CTTAM's Mission Statement is:

Provide certification through credibility, recognition, employability and relationship.

Diversity Statement:

Skills Canada Manitoba recognizes the need for a diverse workforce and inclusive work environment in order to attract and retain skilled employees to the trades and technology sectors. We will continue to address these needs by collaborating with students and partners to deliver culturally relevant programs and to facilitate safe and accessible learning spaces for those pursuing a career in trades and technologies.

Land Acknowledgment:

Skills Canada Manitoba offices are located in Treaty 1 and Treaty 5 territories. Our work spans across the traditional territories of the Anishinaabe, Cree, Oji-Cree, Dakota, Dene and Inuit peoples and the homeland of the Metis Nation. We will continue to develop and deliver culturally relevant programs and to promote Indigenous innovation and invention across Manitoba.

Skilled Trades & Technologies - 2021/2022

Our Mission:

To attract young Manitobans to careers in skilled trades and technologies

Our Vision:

Skills Canada Manitoba will be a leader and vital partner in meeting Manitoba's skilled workforce needs
