Assess the contestant's ability to perform duties relating to document graphic design and pre-press

SKILLS AND KNOWLEDGE TO BE TESTED

The projects focus on practical work. Theoretical knowledge is limited to that required to perform practical work:

- Reading and understanding technical specifications
- Implementing time management and work flow planning;
- Understanding and utilizing basic design fundamentals;
- Producing preliminary sketches;
- Editing pixel based digital images and colour correction;
- Using industry standard software for vector illustration & page layout software;
- Working with copy and applying typography principles;
- Ability to design for both print and digital display;
- Applying print pre-press standards (resolution/screen ruling, bleed, etc.);

- Exporting to final formats (pdf, eps);

PROJECT RELEASE INFORMATION

On the day of competition, a 15 minute briefing will be given, this will be the competitor's opportunity to ask questions and gain a full understanding of the project.

Competitors are encouraged to follow the Technical Requirements video playlist which has been supplied by Skills Canada to help competitors achieve technical proficiency.

Watch the playlist here:

THE IMPORTANCE OF SKILLS FOR SUCCESS FOR CAREERS IN THE SKILLED TRADES AND TECHNOLOGY:

In response to the evolving labour market and changing skill needs, the Government of Canada has launched the new Skills for Success (former Essential Skills) model defining nine key skills needed by Canadians to participate in work, in education and training, and in modern society more broadly. SCC is currently working with Employment and Social Development Canada (ESDC) to bring awareness of the importance of these skills that are absolutely crucial for success in Trade and Technology careers. Part of this ongoing initiative requires the integration and identification of the Skills for Success in contest descriptions, projects, and project documents. The following 9 skills have been identified and validated as key skills for success for the workplace: 1.Numeracy, 2.Communication, 3.Collaboration, 4.Adaptability, 5.Reading, 6.Writing, 7.Problem Solving, 8.Creativity and Innovation, 9.Digital
