SPECIAL CONDITIONS / ADDITIONAL INFORMATION:

Please be advised that we only have space for 8 competitors in the Secondary and 4 in the Post-Secondary competitions. 2 competitors may be allowed from an individual school if there is no other school trying to enter a student.

THE SKILLS FOR SUCCESS FOR CAREERS IN THE SKILLED TRADES AND TECHNOLOGY.

In response to the evolving labour market and changing skill needs, the Government of Canada has launched the new Skills for Success (formerly Essential Skills) model defining nine key skills needed by Canadians to participate in work, in education and training, and in modern society more broadly. Skills Canada is currently working with Employment and Social Development Canada (ESDC) to bring awareness of the importance of these skills that are absolutely crucial for success in Trade and Technology careers. Part of this ongoing initiative requires the integration and identification of the Skills for Success in contest descriptions, projects, and project documents. The following 9 skills have been identified and validated as key skills for success for the workplace: 1.Numeracy, 2.Communication, 3.Collaboration, 4.Adaptability, 5.Reading, 6.Writing, 7.Problem Solving, 8.Creativity and Innovation, 9.Digital
